STEVEDORE'S STRIKE OFF

Hitting a man when he is down is strictly against British principles — but being hit when she is down seems to be the lot of Britain on many occasions. Latest, and perhaps most odorous of these was the strike of London dockworkers, which caused a great deal of hardship to many folks in Britain and was of such seriousness that the labor government of that country was forced to call out the army to see that essentials were unloaded from ships.

Britain is struggling now in her efforts to rebuild and in her efforts to keep her head above the financial slough which threatens her so seriously. This same slough is one which has its backwaters in Canada—for according to recent announcements we may expect our exports to Britain to be restricted to some extent, simply due to her inability to pay. Ill-judged strikes can do nothing but place stumbling blocks along an already tortuous path. It is high time that workers in general realized that high pay for the moment is not necessarily the most desirable objective. Continued work and continued general prosperity, greater efficiency and greater production per man hour may well offer more continuing rewards.

Slowing down and obstructionism no doubt creates jobs for more men temporarily, but it also raises costs, and these increased costs are paid chiefly by those who had hoped to reap the benefits . . . the working man.

Moreover high labor costs and low efficiency accelerates the trend toward the use of automatic machinery in production and thus again works toward the detriment of labor.

And now . . . the rainmen of Britain seem to be swinging back toward their threatened strike!

During his speech a politician noticed an old lady sitting down front who appeared particularly interested in what he said. Afterwards, he took occasion to meet her and ask for her vote.

"Well, sir," the old lady said, looking him in the eye, "you're my second choice."

The politician thanked her and asked cheerfully: "And who is your first choice?"

"Oh," she replied, "just anybody."

TWENTY YEARS AGO

Twenty years ago last week (July 21st to be exact) what had, in the morning been the business section of a promising town, was by noon, little more than a pile of rubble. Wainwright had not been the victim of modern warfare . . . it had been the victim of a warfare that has been going on ever since man began to use fire . . . the warfare against the danger of fire gotten out of control.

On that fateful Sunday morning twenty years ago almost the entire business section of Wainwright was wiped out in the matter of a few hours. Fanned by a high wind, the fire, which started in or near the Atlas Lumber Yard soon reached such proportions as to render the local fire-fighting apparatus practically useless. Lines of hose themselves caught on fire so terrific was the heat.

Then followed the hectic days of re-adjustment. The days when the only store in town was the Empress Cafe, which by some miracle had escaped. A special train had to be brought in to provide food for the townspeople. Trade was at a standstill. Everything was in a hopeless mess.

But Wainwright built again. Hardly had the ashes stopped smouldering before plans were being considered for the re-establishment of the businesses which had suffered. Following the brief period of prosperity after the fire, the depression came along to add to the handicaps, but still progress was in evidence.

And now, the last remaining scar, the old basement of the premises once occupied by the Armstrong store on the east side of Main Street is to become the site of a bowling alley.

Let us not forget, however, that fire is a constant menace. Every town or village, every home, is in danger, and the price of safety is constant vigilance.

When Ethan Allen, the Revolutionary hero, was courting the widow Buchanan, he used to take a short cut to her home through the cemetery.

The desecration outraged some religious neighbors who decided to teach him a lesson, so one night when he vaulted the fence into the cemetery, he landed in a pit six feet deep. From above came a weird moaning, ending with "Ethan Allen, what art thou doing in my grave?"

Unperturbed, Allen looked up at the ghostly figure and asked, "Well, what in thunder art thou doing out of it?"

ATLANTIC PACT GETS BY U.S. SENATE

With isolationism again rearing its ugly and impractical head in the U.S. Senate, it was feared last week that the ratification of the Atlantic Pact by the government of the United States might be held up indefinitely. Plans had been made to propose amendments, which, while in themselves not too important, would result in delays during which time the forces of the isolationists might rally their supporters. The old cry of "no more entanglements in foreign wars" was again being brought out of the mothballs . . . and the one nation which can do more than any other to stabilize the world, and insure peace if peace is possible, seemed to again be seeking to hide from the reality that this world is one world, and that in modern warfare, it is almost impossible to be neutral.

Twice in the past forty years, the United States has tried to remain neutral. Twice it has been forced into war by inescapable factors.

It has been forced in, first, by a realization that its own interests and safety were closely tied up with the interests and safety of the balance of the English speaking world;

Secondly, by the fact that it has in both cases been the victim of unprovoked enemy action.

We could think of no reason why it is desirable to enter a war, and the citizens of the United States follow a just and commendable course in trying to avoid engaging in warfare—but so do the citizens of any other country for that matter. But there are times when there is a wide divergence between that which is desirable and that which is necessary . . . Britain tried to avoid the war with Germany, and the late Mr. Chamberlain has since been castigated for his actions in Czechoslovakia, and elsewhere. He was just as honest, and as realistic as any United States isolationist . . . perhaps a lot more so.

So, it is gratifying to note that the United States Senate at least will not be hoodwinked into sidetracking the one organization which can afford us, at the present moment, some semblance of security. Working hand in hand with the United Nations (itself a completely powerless organization) the North Atlantic Pact can put teeth into our demand that peace be maintained.

Everybody in Ottawa was thinking about trade last week.

The plain, hard fact of dollars and cents stared the capital in the face everywhere it turned. And this was the situation:

Canada's trade is at record levels. But it's getting tougher all the time. And a big percentage of the Canadian people depend on foreign trade for their jobs.

Just as retail merchants all across the country find it harder to sell consumer goods now than they did two years ago, the Dominion is finding it harder to sell its products abroad.

Practically all of the products that are available for export are being sold. But the sales problem, government trade experts say, isn't getting any easier.

It's basically a result of the trade dislocation started by the war, that resulted in a king-sized currency problem. Canada extends big credits to the United Kingdom so she can sell her farm products to her traditional market—the U.K., but from practically every other country Canada wants cash—in United States dollars or gold.

And a shortage of U.S. dollars faces nearly every country in the world.

Here's what happened on the trade front during the week:

1. Sir Stafford Cripps, British chancellor of the exchequer, announced in London that Britain's growing shortage of gold and U.S. dollars forced her to slash imports from dollar areas—including Canadian goods.

The Anglo-Canadian food contracts—worth nearly \$400,000,000 to the Dominion this year—wouldn't be affected. But Canada's food exports of basic metals and wood products would.

2. Trade Minister Howe told a press conference Canada's foreign trade is booming. The only "disturbing" aspect is the unfavorable balance of trade with the U.S. Canada buys more there than she sells.

3. To meet the shortage of U.S. dollars, Canada will wage an extensive campaign to sell more to the U.S. and buy less.

The Dominion Bureau of Statistics reported 1948 broke all peacetime records for trade.

Mr. Howe indicated the government plans to bring some items—steel and later on, consumer goods—controls and reimpose controls that were relaxed during the last 10 months. Controls originally were imposed in 1941 when the Dominion's shortage of gold and U.S. dollars sunk to less than \$500,000,000. Reserves now are less than \$400,000,000 on trade with the U.S. in the first five months of 1949.

4. The capital looked, too, at a gloomy western crop picture. The Dominion Bureau of Statistics report on crop conditions showed that the western grain crop was only 75 per cent of normal at the end of June. Last year at the same time the wheat crop had rated as 85 per cent of normal.

Alberta and Saskatchewan were hardest hit, and the poorer condition of the crop was blamed on widespread drought.

Rye was in worse shape than wheat. It was rated at 54 per cent of normal. The bureau emphasized that its condition report didn't necessarily indicate the final yield. But crop reports all year long have not been optimistic about the chances of a big crop in many western areas. Large sections of central Alberta and southwestern Saskatchewan expected next year's yield of 19 bushels to the acre or less.

Employment Up
If the crop picture was gloomy, the employment picture was good. The Dominion Bureau of Statistics report for May 1 at 1948—the highest ever recorded in Canadian history for that time of year. The index is based on 1935 employment equalling 100.

And wages were higher than ever, too. Wages for the week of May 19, 1948, leading firms averaged \$43.10 per person. They were \$39.70 in the same week last year.

Other reports coming from the bureau indicated Canada is a long way from a depression. Production of such basic commodities as iron and steel and hydroelectric power, for example, is running ahead of last year's production. And in 1948 cattlemen sold the biggest number of animals for the highest average prices on record.

Northern Maneuvres
Early next month the Canadian Army and R.C.A.F. will stage the Dominion's biggest peacetime land-air defence exercises.

More than 1,000 permanent and reserve force troops will be thrown into the manoeuvres in a test of northern defences.

It will also be the first test of the Princess Patricia's Canadian Light Infantry since it became an airborne battalion, the first of Canada's three airborne battalions.

Joe Rutledge Says

By Joseph Lister Rutledge

VOICE OF THE PEOPLE

The very definite set-back sustained by Mr. Cridwell's legions in the recent elections might be attributed to a number of causes. Optimists might think that it suggested a growing public intelligence that had drawn some telling conclusions from Britain's dubious experiment which has so obviously failed to provide a miracle or even change the essential thinking of a people. It may be argued, and probably will be, that a satisfied people make few drastic changes, and that where prosperity is definite and general, change favors the status quo in power to retain public confidence. It may be that the public followed the thinking of one voter. He said: "Successful businessmen do not remove managers who, whatever their lesser shortcomings, have themselves been generally successful." That, perhaps, is prudent thinking. It may be too that the public was satisfied that the existing government had offered all the social benefits that any party could safely provide.

However, one may argue the case, the public has spoken very definitely in favor of our present system for, combined, the two major parties, the parties of free enterprise, represent four-fifths of the voters. But, while the set-back to the forces of socialism has been definite and, over the past months, cumulative, it is much too early to write it off as a threat. Where one out of every eight voters cast his ballot for socialism, and another 30,000 voted unhesitatingly for the labor progressive policies of out-right communism there can be no thought that we have come to a time of truce.

Obviously neither socialism nor communism are at their best in periods of general good times. They are the ideologies of dissatisfaction and want and despair. If, fighting in times of well-being, of satisfied people, and steady progress, conditions wholly adverse to the success of their propaganda, they can still retain the devotion of one in seven or eight of the voters, it is no time to believe that they are the ideologies of dissatisfaction and want and despair. If, fighting in times of well-being, of satisfied people, and steady progress, conditions wholly adverse to the success of their propaganda, they can still retain the devotion of one in seven or eight of the voters, it is no time to believe that they are the ideologies of dissatisfaction and want and despair. If, fighting in times of well-being, of satisfied people, and steady progress, conditions wholly adverse to the success of their propaganda, they can still retain the devotion of one in seven or eight of the voters, it is no time to believe that they are the ideologies of dissatisfaction and want and despair.

It is quite possible they may be, if people begin to seek plausible remedies for conditions they do not understand. They might recover a wide following. They have lost a battle, but not a campaign. Let us hasten to state the obvious fact that we will always continue our present scale of prosperity, as it is to believe that socialism, or its sinister elder brother, communism, has shot its bolt. The only safeguard to eternal vigilance.

The Star does not hold itself responsible for opinions expressed by the writers of items and should not be longer than 500 words.

Edgerton, Alberta

July 31, 1948

The Star-Chronicle, Wainwright, Alberta.

Dear Sir:

In your recent issue you report the action by the Provincial Convention of the Canadian Legion in passing a resolution asking the Federal Government to legislate a system of Government-owned hospitals, presumably to ease the burden of hospital, medical and surgical treatment. This is a matter that has many times been brought before the Federal House but always without success and I believe that the

First time in September—probably starting Sept. 15.

Indications are that it will be busy. Lots of legislative work was left over last spring when parliament was dissolved for the election. And some legislation probably will arise from election promises made during the campaign by government leaders.

First of all there's the budget to pass. The budget was introduced and its tax cuts now are in force, but it still hasn't been approved by parliament. The Commons voted the government enough money to carry on until the fall.

Then there probably will be a bill to abolish appeals to the judicial committee of the Privy Council and make tribunals. The Privy Council has ruled the Supreme Court of Canada the final parliament has the authority.

proposition has never yet received the support of any leader of any political party within the House.

It is true that the Government already legislates gambling and that there is a great deal of inconsistency in its legislation but it is also true that the majority of members have not wanted to give gambling the stamp of approval which would follow the legislating of sweepstakes. Some things are permitted but that does not mean that they are commended. There is no doubt but that the legislating of sweepstakes would encourage gambling on a large scale. We know that there has been a great deal of illegal gambling on sweepstakes and the Government seems to be cracking down on that thing and many would prefer to gamble legally rather than illegally. As for the motive of such adventures, the one mentioned is only one of many, worthy or unworthy. I am of the opinion that the prevailing motive is simply the desire to take a chance.

Personally, I am opposed to gambling in any shape or form. I am not opposed to the element of chance or adventure. The gambling I object to is the attempt to win something for ourselves for which it is not our desire or intent to give any honest equivalent and which must be obtained at the expense of another. When I win, I get something for which I have no moral claim and at the expense of one or others who very often can ill-afford the loss. That the whole transaction is voluntary on the part of all concerned does not affect the moral quality of the act. In my judgment, a moral principle is involved and such a matter is not determined by majority vote. Our human laws may decide what is a crime; they do not determine what is a sin.

I know that for many, issues are judged by other than moral standards. But can such sweepstakes, as proposed, be justified by practical results? The Government has no money of its own to assist any individual or institution. The money it would use to pay the prizes would have to be raised by the Government, either by taxation or by borrowing. It would have to come from the people just as truly as if they paid their own bills, and who are the people that would pay? The probability is that the honest man, who does not believe in gambling, would want his hospital or medical bills to be paid in whole or in part by the contributions of gamblers, many of whom are in greater financial need than he is himself!

Of course the argument is advanced that many people will gamble anyway, legally or illegally; that a great deal of money has been going out of the country and why not have the Government secure it and use it for benevolence within the country? It already collects vast sums from the sale of liquor and tobacco.

Then what is the advantage in encouraging the people to spend their money on sweepstakes tickets over making

appeals for public benevolence. Is the latter not an appeal to a better part of our human nature? Then I have been assured that some institutions have no desire to receive support from such a source, and men who respond generously to benevolent appeals would refuse to respond if funds were received from a scheme which in their belief was a detriment rather than a benefit to human welfare.

I wonder how many of the advocates of Government sweepstakes would accept an unbiased and factual verdict upon the advantages of their plan in affording any real solution to the problem of hospitalization and public health.

Yours truly,

GEO. A. STEEL

BANGS DISEASE

Bangs disease in cattle or Contagious Abortion is causing great losses to cattle breeders in this district. This year there is a veterinarian located at Chauvin who will do the vaccination and testing work for this disease. Farmers are asked to organize their districts to ensure that none will be missed when the Vet is in their district. Application forms for Bangs disease vaccination are available in this office.

PATHOLOGY LABORATORY

The Provincial Animal Pathology Laboratory at Edmonton will examine and report on diseases of any farm animal. They prefer to receive chickens and young animals alive. In order to make the best diagnosis of disease. Anyone having a sick animal to diagnose for disease can send it direct to the laboratory. The express charges are the only cost in this service.

SOIL DRIFTING

The last week-end demonstrated that the soil in this area is badly in need of fibre. Any land without a good vegetation cover drifted quite badly. Temporary control methods for drifting like cultivating across the prevailing winds or plowing furrows, at intervals will help the situation. Spreading straw or manure will check drifting in very bad areas. The main thing is to do something before too much valuable top soil is lost.

HOT WATER SYSTEMS

Carrying water in pipes is one chore that could be easily done away with in this country. Hot and cold running water and sewage systems can be installed in every farm home at a very reasonable cost. Nearly every farmer is a good enough mechanic to do the work himself. Circulars are available at this office.

NEWSNOTES FROM THE OFFICE OF YOUR DISTRICT HOME ECONOMIST

Sheila M. Forrest, Rylee
Greetings homemakers:
These hot summer days you will be looking for cool dishes to satisfy your hungry family. Have you exhausted your own collection of salad ideas? Send for a copy of the Salad Bowl—you may pick up a few pointers. Your own garden may not be producing lettuce but remember your family needs the essential vitamins A and B as well as iron which are associated with green foods and lettuce will be cheaper now than in the winter.

Field tomatoes are beginning to come into the stores and they are rich in Vitamin C. That's good for healthy gums and tissues is a vitamin which we in Canada do not get in a large enough supply.

For an interesting salad plate with tomatoes—cut the top out of the tomato, stuff with cottage cheese mixed with salad dressing. Stuff the tomato and replace the top. Nothing wasted but a little variety. Serve the lettuce leaves with your own special buns and most of your family will not complain. Father may like a piece of ham with his, however for Sunday dinner if no one is working too hard, this type of meal should give Mother a rest as well.

For that touch of black to complete a salad, stew a few prunes without sugar. They're good for you as well as good to eat.

Did you know that most enzymes which cause fruit to turn brown in jars, and most organisms which cause spoilage in canned foods thrive in a alkaline medium. If however you add a teaspoon of lemon juice (acidic) to a quart of pears or other fruit you get clear color and a teaspoon of vinegar per quart of peas or beans will be of aid in keeping does not harm flavor, nor is it harmful to your family.

POTATO BEETLES

W. Lobay, Supervisor of Crop Protection, Alberta Department of Agriculture, stresses the importance of promptness in the control of potato beetle. He points out that since soft bodied grubs are much easier to destroy than the hard backed beetles, early poisoning is especially effective in reducing loss.

There are many useful insecticides available, including D.D.T. and rotenone products. Paris green and arsenate of lead are quite effective, but they are deadly poisons and are less commonly used than formerly. All poisons should be used according to the directions on the container and should be kept out of reach of children.

If sprayers and dusters have been used for 2-4-D to destroy weeds, make sure that they are thoroughly cleaned before using them for dusting and spraying to control potato beetles. Even small quantities of 2-4-D in contact with the potato crop may prove disastrous.

RED RASPBERRY VARIETIES

The selection of raspberry varieties is the foundation of successful raspberry culture. Varieties known to be hardy, productive and of acceptable quality should constitute the main portion of the planting, while preliminary introductions of promise should receive trial on a small scale at first. Local conditions influence variety response markedly so that results of variety trials may be taken only as a general guide.

Brief comment is made on raspberry varieties on trial at the Dominion Experimental Station, Morden, Man., in recent years. Chief and Latham have demonstrated their superiority in the station trials and generally throughout the prairies, says C. R. Ure, Assistant in Horticulture. Observations suggest that Chief is the hardier, although both possess ample hardiness for local conditions. The two provide a fine combination, either for the home or commercial planting. Chief ripens several days ahead of Latham and is generally near the top of its fruiting season when Latham reaches its peak of production. This provides a long picking season. Latham has maintained a superiority in yield over all varieties at Morden during the last two years, averaging 4,500 pounds of berries per acre. Herbert has shown less hardiness than the former two and the crop is more adversely affected by the heat. The large, high quality fruits on vigorous robust canes make this variety a favorite. Sunbeam, Moonbeam and Starlight exhibit abundant hardiness but are inferior to the foregoing in quality, and have yielded crops of less than one-third that of Latham. They are suggested for trial only in extreme northern conditions where Chief fails.

The next step in raspberry varieties is into more quality but less hardiness. Covering of the canes during winter often permits production of fine crops of high quality fruits from these semi-hardy kinds. Viking deserves a trial in favorable locations. In productivity it has given a return between that of Chief and Latham. The large attractive colored fruits are very fine in quality, rated superior to Latham. Robust, strong, smooth canes are appreciated by pickers. Madawaska and Gaitheau, two recent introductions from the Central Experimental Farm, Ottawa, have been very productive of fine quality fruits. Although killing to the snow line occasionally, the canes have a remarkable ability to develop side shoots and still produce a heavy crop. Madawaska is rated very highly as a freezing berry. The variety Ottawa has shown less fall hardiness and vigor under Morden conditions. The firm, medium red fruits handle very well and are rated with Viking in flavor. It appears worthy of trial where winter is not a problem, as reports indicate a susceptibility to this disease. Newburgh is liked by many growers. It possesses a fair degree of hardiness and produces large, dark red fruit of fair quality. Taylor develops large, fine quality berries that preserve and freeze well. The strong, vigorous canes should be covered for winter to ensure survival. G-201 has exhibited a fair degree of hardiness; fruit quality is fair, and yields have been close to Latham. The varieties Trent, Hilda and Milton have not done well under Morden conditions.

Trials suggest Chief for hardiness and earliest, Latham for the main Taylor for top quality, large fruits. Canes of the last named will require winter mulching to ensure success, try than the hard backed beetles, early poisoning is especially effective in reducing loss.

There are many useful insecticides available, including D.D.T. and rotenone products. Paris green and arsenate of lead are quite effective, but they are deadly poisons and are less commonly used than formerly. By F. W. Maddex

BLOOD TESTING AND VACCINATION

Due to a recent interview with Dr. Saville, Veterinarian, I find that a number of districts aren't getting organized very fast for blood testing and vaccination against "Bangs" Disease. Dr. Saville reports that he has a large district to cover in both Alberta and Saskatchewan, therefore it would appear that the first three first served, in other words, the district which gets organized first will get the service first.

In order to speed up the organization and eventually stamp out this dread disease, I am willing to accept farmers names and number of cows as desirous to be blood tested and vaccinated. I will also accept a list of cows to be tested for T.B. Applications forms will soon be available in this office for T.B. testing. Unless each and every farmer co-operates we are unable to assist you.

moisture the weeds grow faster and it is therefore easier to kill a number of the more common weeds such as wild oats, timothy and Canada and Bow thistles. Wild Oats are easiest killed when they are four or five inches high. Canada and Bow Thistles should not be allowed to get more than seven days growth above the ground, otherwise you are fighting a losing battle in their control. Fall Rye is still considered a good bet in the control of weeds if seeded during the latter part of August on summerfallow. Do not neglect the summerfallow from now until freeze-up.

WAXLESS POLISH
Waxless polish, made with plastic base, is offered by Texas company for use on automobiles, highly polished floors and furniture, tile, linoleum, plastic, silver, brass, copper, enamel, chrome and porcelain. reports The Financial Post. Product, which is said to contain neither wax nor acids which are harmful to paint pigment, is also said to feature ease of application and removal, lasting endurance, and combined properties of cleaner, polisher and protective agent.

IT PAYS TO ADVERTISE

EVERYBODY'S BUSINESS

by Don Graham

It is a human tendency to blame everything and everybody but ourselves for our failures.

Jack complains about his working conditions, his boss and everyone he deals with on the job. Somehow it hasn't occurred to him that, although his environment is not perfect and should be improved, the main cause of his trouble lies within himself.

Reports show that the commonest cause of job failures is not lack of technical skill, but poor personality qualities—particularly a non-cooperative attitude, unreliability and lack of initiative.

Those who have the opposite

qualities — cooperativeness, dependability and driving initiative — are not blind to the defects in their environment. But instead of criticizing, you will find them trying to improve those defects through their own efforts.

Above all, you will find them trying to correct their own personal shortcomings. To such men the world offers the biggest rewards!

Most men who have won success because of their initiative also like to provide for their own and their families' future by their own efforts. Life insurance offers the most dependable way to do this.

**Locker Plant Opens
Friday, July 29th**

Continued from Page 1

under strict thermostatic control. The lockers are located in a small room at the rear of the plant. The largest unit is a 2-horse-power setup, which keeps the main locker room cool. The coolant is carried to the room where two large radiators with blowers carries the effect to all parts of the room.

The setup for the sharp-freeze is similar, with a 1½-horse-power motor. Another 1½-horse-power motor looks after the chill room and a smaller outfit with a ¼-horse-power motor keeps the pickle room at about 40 degrees.

These radiators have to be regularly defrosted (even as does your household electric refrigerator). This is accomplished by a special system which quickly melts the accumulated frost from them and the water thus created is carried away.

The various rooms of the locker plant require very effective insulation in order to enable the plant to be operated economically. Fibreglass was chosen due to its effectiveness and permanency, and the insulation of the var-

ious rooms ranges from 4 to 8 inches in thickness.

While there has been some difficulty in getting the lockers into Canada from the United States, Model Meats and Locker Plant have been promised at least twenty lockers in time for the opening, and further lockers should be arriving shortly.

Just as a sideline, the boys are making tea in the quick freeze room for any who might need it.

You Are Invited

You are invited to attend the official opening of the plant, which will be held as before stated, on Friday of this week.

A special program has been arranged at the Elite Theatre. The program will include a technician showing of movies after which Miss L. Forrest, District Home Economist of Viking will give an explanation on the "Selecting and Preparing of Fruits and Vegetables for Freezing." Mr. L. H. Arnold, of the Provincial Department of Agriculture will follow with a brief talk on the advantages offered by a locker plant.

As an added attraction there will be two fine door prizes. The first prize will be a year's rental of a locker, and the second prize will be a fine ham.

GILT EDGE

Mr. Craig Sr. of Barry Ontario is visiting with his son and daughter-in-law, Mr. and Mrs. H. Craig for a few days.

We have had a good many heavy showers this past week that have greatly helped the crops and gardens. The Old Edge W.I. met at the home of Mrs. L. Babb last week with a good attendance and a good meeting reported.

Mr. and Mrs. Jack Tibbory of Melita, Man. visited at the home of Mr. and Mrs. Chas. Beasley over the week-end.

The farmers took last Thursday to fix the telephone line for which we were all glad to have the use of the phone again.

There was a family gathering at the home of Mrs. Elwood Plaxton Thursday evening in honor of Miss Rose Plaxton from Kansas, U.S.A.

Mr. and Mrs. Les Beasley visited at the McClellon home Thursday evening.

Mr. and Mrs. Ronald Morrison of Greenshields were callers in the district.

Miss Joe McClellon has as her guests for a couple of weeks, her five brothers from Barry and Ivy Ontario. Messrs. Tom, George, Harry, Bill and Frank Dantling. Mrs. McClellon received a telegram Thursday saying that they would be motoring up, and would arrive Saturday. The three McClellon boys and their families all of Lloydminster were home on Sunday to see their uncle.

Mr. and Mrs. Spady left Monday morning for Edmonton where they will visit with friends and relatives in the city for a few days.

We have organized Sunday School with a good attendance so far. The Sunday School is held at one o'clock and church service is immediately after. Mr. Walton has chosen for his text last Sunday "Why Pray?"

Miss Pat Kitchen is the organist for the Sunday School Group and Miss Vivian Beasley is the Sec-Treas.

Mr. Andrew Hison of Blackfoot, Alberta, visited for a few days at the home of his sister, Mrs. Elwood Plaxton.

HEATH

Mr. and Mrs. Jerry Rajotte returned home last week from a motor trip to Banff and Jasper.

Miss Fay Bouck who was attending a Bible Camp at Bracken, Sask., returned home on Friday.

Mr. and Mrs. A. Brunner and children of Weyakwin who were visiting their brother-in-law and sister, Mr. and Mrs. A. Patterson left for home last Wednesday. Miss Audrey Melnyro of Vermilion accompanied them.

Mrs. Venables and her children Roger and Douglas of Saskatoon have been camping for the past three weeks with her brother and sister-in-law, Mr. and Mrs. Ralph Challenger at their cottage at Clear Lake.

Miss Mary F. Stewart of the Royal Alexandra hospital nursing staff at Edmonton, spent the week-end visiting with her cousins, Mr. and Mrs. Ralf Challenger at their cottage at Clear Lake.

ed in two meetings of the group, of one and one half hours each, held after working hours. Out of these meetings came a resolution that incorporated several recommendations for the Curriculum Revision Committee.

This incident is particularly noteworthy as it indicates that teachers are taking an increasing interest in curriculum making. One of the recommendations was that the teachers' professional organization, the A.T.A. should be given increasing responsibility in this respect. The teachers are beginning to insist that in all professional matters in which they are concerned the actual field workers should have a voice.

The principal grievance of these teachers was with the gradual disappearance of History from the Social Studies courses. During the past 15 or 18 years the history parts of the courses have been progressively reduced in favour of such contemporary problems as Social Security, Consumer Economics, Housing and Immigration. The teachers were of the opinion that these latter topics are of great value to students, but that, if students are trained to read and understand the news, they will incidentally become familiar with such problems that affect them.

The primary purpose of the Social Studies course is to train students for citizenship. They should be trained to adopt a type of conduct that is in the best interests of the democracy in which they live. But in a democracy it is not only necessary that citizens act right, they should know why such conduct is desirable. If we are the type of people that blindly follow precepts, then we are the stuff that dictatorships are made of. A democratic people must be an intelligent people. "Ye shall know the truth, and the truth shall set ye free."

The Social Studies teachers unanimously were of the opinion that a knowledge of past History is necessary for intelligent citizenship today. It is the foundation upon which we build. If that foundation is weak, our whole structure of democracy may crumble. There was some difference of opinion as to the relative values of different parts of History. Some felt that Ancient History had few lessons of value for us and had largely no cultural value. But there were no differences of opinion as to the value of the History of the last 800 years.

Many people who have read little of History think that as it is a thing of the past it has little practical value in the present. The same reasoning could be equally well applied to Science or other subjects. If we did not make use of past discoveries in Science, but, in each generation, had to rediscover everything that we made use of, we can profit by the experience and the discoveries made in the past. History has valuable lessons for us. Why should we be content to continue to make the same costly mistakes generation after generation?

This group of teachers also lamented the results of largely abandoning the formal teaching of geography. A large percentage of our senior High School students cannot read the news and properly appreciate it because they cannot mentally put it into its geographical setting. I sympathize with the American tourists who came across the border at Niagara and decided that now they were in Canada they might as well visit relatives in Winnipeg. Not only are such people deprived of a great enjoyment, they have such a restricted, provincial outlook that as citizens of the world, or even of the nation, they are unable to perform their responsibilities.

It may be said that if our schools were to return to a more formal and intensive teaching of History and Geography, it would be a backward step. The teachers maintain that we have taken the wrong road and that we must retrace our steps to the turning where we made our mistake. Whether the officials of the Department of Education will admit the error remains to be seen. But, the unanimous opinion of thirty five senior teachers, chosen at random throughout the Province, is at least worthy of serious consideration.

SALT AS A GOVERNOR
(Country Gentleman July, 1949)
Salt as a governor to control feed intake of cattle has now been established as a safe practice by the University of Arizona. It may be used with alfalfa meal, molasses and grain, as well as with straight cottonseed meal. Animal husbandmen at the university have proved that 16 lbs. of salt per 100 pounds of animal weight in a hay ration has no ill effects and does not interfere with in-

gestion of protein or cellulose. In fact, it seemed to increase the digestion of cellulose.

Just a few years ago a range-cow supplement mixture containing 50 per cent salt would have been thought deadly. But during more recent years when drought hit much of the western range country, cottonseed meal supplement containing up to 25 per cent salt has been one of the major allies of the cowboy. Probably the salt was first added to persuade the cows to accept the meal faster. Then sources found that cows drank more water and ate more of the salted supplement. Somewhere along the line an observing range-man discovered that the average cow will not eat more than one pound of salt a day. Hence the ratio of salt to meal could be made a regulating factor.

One pound of salt to one pound of meal limited the amount of meal a cow would eat to one pound a day. By raising or lowering the percentage of salt in the mixture, it was simple to regulate the meal-supplement intake. That meant feedboxes out on the range could be filled with a weighed amount of the mix with the assurance that it would last a given number of days for the number of animals having access to it.

The system saved western cattlemen a lot of work and worry and

brought droughty cows through the worst seasons in fair shape. Commercial cowmen accepted the practice even though it did not have the backing of scientific research until the University of Arizona tests were completed.

QUALITY HAY
The season is approaching when farmers will be harvesting their forage crops for hay. The time of cutting and manner of handling are important factors affecting the quality of hay. Early cutting together with quick drying or stacking methods conserve

Skinny men, women gain 5, 10, 15 lbs.
Get New Pop, Vin, Vigor

What a thrill! Some folks all over the world are getting "New Pop, Vin, Vigor" and are gaining weight. This is the only food that will give you the extra pounds you need. It is a complete food, containing all the vitamins and minerals you need. It is easy to digest and does not cause any of the usual "diet" troubles. Try it today. At all drug stores.

the nutritional value of the crop. When haying is delayed too long, the stems become hard and fibrous and much of the valuable leaf material is lost, resulting in a feed of low palatability and low digestibility. Long grass, that has gone to seed before cutting it for hay, has lost much of its palatability and also a good deal of those special feed qualities that make hay cut from young grass so valuable. Grass allowed to stand until nearly ripe, is little, if any, better than cereal straw. Hay cut at the proper stage of maturity is low in fibre and high in protein, minerals and vitamins which are the main food elements of forage crops.

In cutting hay, many farmers often place too much emphasis on yield and not enough on quality. Loss of quality on account of rains and heavy dew during the curing process is minimized when the legumes such as alfalfa, sweet clover, Alnus and alder are cut at the proper stage of maturity. Over-ripeness at time of cutting causes a relatively low degree of leafiness, hard and fibrous stems and weak and faded color, says H. B. Wilson, Superintendent, Dominion Experimental Station, Melfort, Sask. Alfalfa should be cut for hay when about one-tenth to one-half of the crop is in flower. Alnus and alder are in full bloom and sweet

clover as it comes into bloom. At these stages of maturity the leaves usually contain from 40 to 50 per cent of the total weight of the plants and contain 70 per cent of the total protein of the entire crop. For hay, sweet wheat grass should be cut as soon as headed and any great delay will result in a marked increase in fibre and decrease in palatability. Fibrous grass should be cut at or before the flowering stage and Western rye (slender Wheat Grass) by flowering stage at latest if good quality roughage are to be secured. With grass-legume mixtures the hay should be cut when the legume is at the right stage.

RAINFALL RECORDS AT SCOTT

Because rainfall is the greatest single factor in prairie agriculture, careful records of precipitation are kept, compiled and studied to provide information on this important phase of our weather. Over a period of thirty-seven years the average annual precipitation at Scott, Sask., has been 13.7 inches but fortunately ten inches of this amount is received in the form of rain, says G. D. Matthews, Dominion Experimental Station, Scott, Sask.

Like other prairie points the outstanding observation has been the tremendous variation ranging from 6.59 inches in 1916 to 29.75 recorded two years previous. Fortunately for

crop production, the precipitation from the first of April to the end of September is two and a half times as much as for the other six months of the year.

Because a third of the annual precipitation and nearly half the rainfall is received, on the average, during June and July the region is better adapted for grain growing than most other crops. But, here again, the lack of uniformity tremendously affects yields of grain. During the past thirty-seven years the rainfall in June has been under an inch six times and over three inches in seven years. Similarly July has had less than an inch seven years, and has had over three inches eight times. Both of these months had their extremes of rainfall recorded a few years apart with the low of .33 for June in 1916 and 26 for July in 1923 followed by the highest for both months received in 1928, with 5.61 and 4.21 inches respectively. Fall precipitation while providing reserve, which is important, is not necessarily associated with good crops the following season, but where no grain in the open prairie are determined largely by the amount and distribution of rainfall during June and July.

CLUB LEADERS CONFER

Leadership for leaders was the theme at the Old School of Agriculture recently when Junior Club leaders from many parts of Alberta met for their fourth annual conference. Over 60 percent of the club leaders of the Province were present to hear from outstanding speakers and to express their ideas and relate experiences. "One of the most successful conferences ever held," was the comment of G. S. Black, Supervisor of Junior Activities.

Among the speakers was N. N. Bentley, Principal of the Vermilion School of Agriculture, whose inspiring address on "Guide Posts For Local Leaders" was exceptionally well received. E. Pineson, Associate Director of Production Services at Ottawa spoke on "Voluntary Club Leaders across Canada," and J. Moore, Public Relations Officer of the Canadian Council on Boy's and Girl's Work discussed the topic "Selling your Club". Guest speaker at the conference banquet was Dr. R. D. Sinclair, Dean of Agriculture, University of Alberta, who reviewed Junior Club Work in the Province and dealt with future possibilities of youth training.

Project workshops were conducted in which live stock, grain, home clubs and other subjects of interest received careful consideration. Film showings, singings and a social evening added to the attractiveness of the gathering. The conference provided an excellent opportunity for club leaders of Alberta to become better acquainted, to discuss their problems, and to bring themselves up to date on ideas and methods relating to their leadership activities.

GILT EDGE

Mrs. Emily Anderson had company from Calgary visiting with her over the week-end. They motored up and report crop conditions along the way much the same as they are here. Mr. Wallon has been visiting at the homes of his congregation these past two weeks.

Several from the district attended the Orangemen's Celebration held at Mannville Wednesday the 13th.

The Gilt Edge ball team played at the Hope Valley picnic and brought home the first prize.

Mr. Tom Gaulie returned to his home at Unity, Sask., after spending a week visiting with Joe and Charlie McClelland.

Mr. and Mrs. Harold Craig visited Mrs. Craig's mother Mrs. Milo at Loughheed over the week-end returning Monday morning.

Mr. Wm. Blasen was down from Edmonton over the week-end visiting at the home of his daughter and son-in-law, Madeline and Elwood Plaxton and daughters.

Mr. and Mrs. R. Stuart of Edmonton visited with Mr. and Mrs. Ed Plaxton Friday to Sunday.

Mr. and Mrs. Jack McClelland and Mr. and Mrs. Frank McClelland came from Lloyd Saturday to spend Sunday in the district.

The terrible wind storm Saturday did considerable damage to the trees and gardens and telephone poles, followed by the much needed rain Sunday and Monday.

Mr. and Mrs. Chas. Beasley accompanied by Mrs. Beasley's sister visited with their brother and his wife Mr. and Mrs. Fred Goddard in Clarendon last Sunday.

Mr. and Mrs. Vic Fielding left on Tuesday's flier for their home in New Westminster, B.C.

Mr. and Mrs. Ed Plaxton and Mr. and Mrs. Penton of Irma took three days last week and went on the Hereford tour, they visited Calgary and points south.

The orangemen's service scheduled for last Sunday was postponed to Sunday, July 31st.

Kenneth and Francis Craig and Robert Anderson are working out at the army camp these days coming home Saturday nights to spend Sunday at home.

Mrs. Emily Anderson and family visited at the Pete Spady home Sunday.

WALL FINISH

Quick-drying, one-coat wall finish that "paints and plasters" in one application is offered to cut home building and remodeling costs and to speed interior finish work, reports the Financial Post. Designed especially for use on wallboard and other modern dry wall construction, the new synthetic rubber-based coating gives a "rough plaster" finish without a high cost of lathing and plastering, Chicago maker states.

Is brushed on like ordinary paint. Scrolls and design patterns can be worked into the texture. Comes in cream, blue, peach, green, rose, and

white. Finish is said to expand and in wall blemishes such as cracks, contract on wall surfaces with chan-seams, small holes, etc. Can also be used in temperature and weather. Fills used on old plaster walls.

FABYAN

Mrs. Golding's sister and brother-in-law, Mr. and Mrs. Cody and family of Ardmore visited with them for two days last week.

Mr. and Mrs. Law and family and Mrs. P. Bell and family all of Edmonton are visiting with Mr. and Mrs. Y. Henderson and Mr. and Mrs. Roy Friday this week.

The ball tournament held at Paschenale on Sunday was well attended and once again Paschenale ball team were the winners. Despite a shower of rain they were able to continue playing and the basket supporters were "enjoyed" also.

Mrs. Bodnar, Joan and Delores are visiting in Edmonton for a week or so. Mr. Jim Laycock made a trip to Edmonton this week with a truck load of cattle.

Miss Irene Carter is home again having spent the past three months in Edmonton.

Mr. and Mrs. John Adams of Vancouver, Mr. Robert Adams of Alliance Nebraska motored to Fabyan on Sunday to visit with their brother, Mr. Hugh Adams and Mrs. Adams.

Mr. Mitchell McCaghey is relief foreman at Camrose for one month.

Mr. and Mrs. Orval McCaghey and son Harry of Edmonton are spending this week with Mrs. McCaghey.

Stanton, Harold, and Wilfred Wright left Monday morning by bus for Rimley to spend a month's holiday with their grand parents, Mr. and Mrs. G. H. Smith.

Miss Shirley Duppette of Edmonton is visiting with her cousin Chlois Wright during holidays.

Fabyan is growing, besides the new town pump, a pump house is under construction and nearly completed.

ASCOT

Mr. and Mrs. G. N. Valieu and Philip returned home from a week's holiday at Banff.

Pern Jackson spent a week's holiday visiting friends and relatives in the Marwayne district.

Mrs. G. Valieu is taking care of little Bobby Ratnay while Mr. and Mrs. Dave Ratnay are on their holidays.

Mrs. Riden is leaving for her home in England on Tuesday after spending a two months visit with her daughter Mrs. S. Bath.

Mr. and Mrs. Bob Haywood and Arthur returned home this week after a holiday spent at Calgary, Banff and Jasper.

Miss D. Harrison is now working at the Cataldo Ranch.

Walter Jerram has been spending his holidays in bed with the mumps.

Mrs. A. Rodgers, Carol and Lynn have been visiting Mrs. Rodgers folks.

Mr. and Mrs. Cotton at Calgary.

G. H. Hines of Marwayne was visited by Mr. and Mrs. V. C. Hines and boys. Mr. A. T. Hines and Denny, also brothers to the G. Jacksons and D. E. Hines homes this week-end.

Mr. R. H. Valieu is going to wear his hat on the back of his head and look both ways while crossing the railroad track. He had a plank knocked off the back of his trailer by the train when crossing the track a few days ago.

We are sorry to hear James McWhirter has been ill with the measles. We are very sorry that Harvey Gullekean had the misfortune to fracture a jaw bone and knock quite a number of teeth loose while, working at the oil wells in Lloydminster. He was taken to Edmonton for treatment. Mr. and Mrs. E. Gullekean left for Edmonton on Saturday morning to see him. Hope to see you home and well soon, Harvey.

Miss Joan Tattarall spent Saturday night with Freds. Hissett.

WHITE CLOUD

The July meeting of the G.E.W.L. was held at the home of Mrs. L. Babb with nine members and one visitor present. The meeting was opened by singing the club song and repeating the prayer, the roll call was given by a recipe, Mrs. Marvin Plaxton and Mrs. Ted Goddard attended the Conference held at Holden and Mrs. Plaxton gave an interesting report on the meeting. Next the conference is to be held at Wainwright.

A picnic was planned for August 1 at Clear Lake.

Mrs. D. Gardiner read an agricultural paper on "Wingless Chickens" something very new in the chicken line. Mrs. A. Dickout, a paper on "Health the topic 'T.B.' very appropriate considering the drive in progress. Mrs. L. Babb on Citizenship.

"Family Allowances for the Eskimos" Mrs. T. Goddard a helpful hint for handicraft workers.

The meeting closed with the singing of "O Canada" the next meeting to be held at the home of Mrs. D. Teeter.

(Last week)

Mr. and Mrs. Joe Tondt and family motored to Calgary to visit relatives and take in the Stampede.

Miss Joyce Jorganson and Mr. Orville Jorganson of Bonnyville, have been visiting at the L. Tondt and Joane Myer homes. Orville going to Calgary with his grand mother, Mrs. Cunningham.

Mr. Earnie Myer is with Mr. H. Cooper working for Mr. G. Terry.

The G.E. "Yellow Jackets" have been very lucky playing soft ball this season. With Mr. Ed Plaxton as coach they plan on practising a little hard ball just for fun.

A very much needed rain fell in the district Saturday afternoon and night, also Sunday.

Sew and So Club

July meeting was held at the home of Mrs. Joy Kline. There were fourteen members and three visiting ladies present. The program for the meeting was supplied by Mrs. Nora Taylor.

The opening song was "The More We Get Together" and the Roll Call a "Proverb".

A number of members brought parcels of good used clothing to be parceled and sent to the needy. Mrs. E. Christensen kindly offered to parcel these clothes and send them to the Red Cross, and requests any member having any that they wish to send please leave them at her home.

We decided that we would not have a picnic this summer and that we would have a "Chicken Supper" and Battle over Blanket to the fall.

We also decided to buy a Plaque for the door of the ward in the hospital that the Club has furnished.

Letter was read from the District Home Economist from Vegreville, who said in her letter that she would come to a meeting and give a lecture or demonstration on any of the following: sewing, cooking, canning, pressure cooking and interior decorating. It was decided that we would have her attend at our next meeting and demonstrate "Pressure Cooking". If she is unable to come the day set for our next meeting, we will have the meeting whenever it is convenient for her to come.

A very interesting contest - being too many of him to lick."

Name Products of Trade Names" was won by Mrs. C. Ballentine. The raffia was won by Mrs. E. Willetton. The closing hymn was "I've Got My God to Thee", after which our hostess served a very delicious supper.

Compound interest and advantage are very similar: the longer they are continued, the better the results.

There are more than 125 tree species in Canada.

If men were as anxious to do right as they are to get their "rights", the world would soon be righted.

"Why does the editor call himself 'we'?" "So the fellow who doesn't like what he says will think there are too many of him to lick."

Madame . . .

Moved by Cr. Clarke that Mothers Allowance reports submitted by Inspector, be accepted. Cd.

Moved by Cr. Lawrence that Hattie L. Jones and Margaret Ann McIntyre be recommended for Old Age Pensions in the maximum amount. Cd.

Moved by Cr. Watt that NE 16-59-1-With, be leased to L. J. Thibault for the current levy. Cd.

Moved by Cr. Beahm that NE 16-59-1-With, be leased to Roy Morris for 1/4 share of crop and 10.00 cash. Cd.

Moved by Cr. Beahm that NW 16-59-1-With, be leased to V. W. Sinclair for the current levy. Cd.

By-law 341—Concerning Sale of SW 16-59-1-With. Cd.

Moved 1st reading Cr. Beahm. Cd.

Moved 2nd reading Cr. Gordon. Cd.

Moved 3rd reading Cr. Clarke. Cd.

By-law 342—Concerning sale of SW 14-47-4-With. Cd.

Moved 1st reading Cr. Stone. Cd.

Moved 2nd reading Cr. Watt. Cd.

Moved 3rd reading Cr. Lawrence. Cd.

By-law 343—Concerning grants. Cd.

Moved 1st reading Cr. Stone. Cd.

Moved 2nd reading Cr. Clarke. Cd.

Moved 3rd reading Cr. Gordon. Cd.

By-law 344—Concerning sale of NE 16-59-1-With. Cd.

Moved 1st reading Cr. Beahm. Cd.

Moved 2nd reading Cr. Watt. Cd.

Moved 3rd reading Cr. Lawrence. Cd.

Moved by Cr. Clarke that Custom Work for H.D. 5 outfit be set at \$5.00 per hour. Cd.

Moved by Cr. Stone that a two wheeled trailer for moving Bulldozer blade be purchased for \$400.00. Cd.

Moved by Cr. Gordon that a rubber tired 5-7 ton wagon be ordered for North outfit. Cd.

DONATION

A donation in lieu of flowers to the Cancer Fund, in memory of Mr. A. J. Anderson Sr. by Jean and Allan Hurton is acknowledged.

LOCAL NOTES

George McEwen was a recent visitor to the R.C. cost.

Mr. and Mrs. Gerald Scott and Bruce Scott, of Belleville, Ontario, have been visiting with Mrs. Scott's father, Mr. Axel Johnson, for a couple of weeks.

The office of the Public Health Nurse will be closed until August 20th, as Miss L. Twenty will away on a three-week holiday.

Nice progress is being made on the Sam Dickson house, with Norman Cargill as the contractor.

The survey gang, which has spent most of this summer, and part of last summer (working) on the connecting line between Saskatchewan 40 and Alberta 14 left this week for Grimshaw.

The road gang made a nice start on the Butte road, but didn't carry on nearly long enough. Let's hope work will soon be resumed.

Ed. Dahl, Chas. McKenzie and Ed. Gordon were visitors to the Edmonton Exhibition.

Joe Purtillo has been at New Westminster and other points in B.C. visiting with friends and relatives.

Valma (nee Reinhardt) and her husband, have been visiting with her parents, Mr. and Mrs. G. L. Reinhardt.

Norman Cargill is working in Edmonton at carpenter work.

MARSDEN

During the church service on Sunday July 24th, the rites of infant baptism were observed. Linda Marguerite, infant daughter of Mr. and Mrs. Norman Hays and Sharole Jean, infant daughter of Mr. and Mrs. Lloyd Dingman received the holy rites of baptism. The Rev. M. Teskey, minister of the church officiated.

(Too late for last week)

The regular meeting of the W.A. of the United Fruit School was held on Wednesday at the home of Mrs. J. J. Loy. The missionary study period was conducted by the President Mrs. H. H. Polkinghorne. Two new members joined the W.A. at this meeting. Mrs. Teskey invited the ladies to the manse for the August meeting. A delicious luncheon was then enjoyed by all present.

FRAM

Mr. and Mrs. H. Hansen of Yellowknife and Mr. and Mrs. Thor Thorson, motored to White Sulphur Springs, Montana, and Seattle, where they will visit with friends and relatives.

Mr. Joe Silvano and Magda of New Jersey, are visiting with their sister and brother-in-law, Mr. and Mrs. Max Witt.

A neighbourly get-together party was held at Trum School honoring the newlyweds, Mr. and Mrs. Vernon Graham. The evening was much much enjoyed with community singing and contests. Marvin Holmsted, in a few well-chosen words welcomed the bride to the district to which Vernon suitably replied. The honored couple were presented with numerous gifts.

The evening closed with good songs and singing "For She's a Jolly Good Fellow."

Mr. and Mrs. Pete Powers who have been visiting here for the past month, have returned home to the coast.

Mr. A. Wills, Mr. Wakefield, Mr. J. Cuthbert and his two daughters, Laubhorn, Elaine Howard and Lorna Armstrong motored back from Saskatoon Friday. There were three attending the C.C.P. and C.C.Y.M. convention.

The proximity of royalty, coupled with the heat, proved too much for W.R.A.C. (Women's Royal Army Corps) sergeant Joan Bayliss, who fainted when Princess Elizabeth reviewed her battalion at Shrewsbury, Eng. Here the princess passes, reviewing the non-combatant sarge like a light. The rigid bandstand in background and the she-warriors in foreground are testimony to the rigidity of British army discipline.

McLAUGHLIN

Well things look a bit brighter for the gardens and crops after the showers this last week. Anyway there will be some feed. Talking of gardens, as most people know our garden is on the site of the old blacksmith shop, the result is that of the potatoes grown there one potato has enough iron in it to last five months. Two potatoes eaten will stop a witch. One fellow ate three and the government are using him as a mineral detector.

Mr. H. Elliot, our general storekeeper has arrived back after a six month stay in England. Harold says that tobacco is \$1.00 an ounce. Chips and fish are plentiful. Bacon and ham are where you find them. Hospitalization runs around \$16 a month with the boss paying a share as well. Harold tells of a person who went with his wife in the car to round up a hay, and the government are using him as a mineral detector.

Words of wisdom. A tree is an object that will stand in one place for years, then jump in front of a lady driver.

Mrs. L. Ward is back after her week at the Vermilion Farm Week. Mrs. Ward says it is the most enjoyable time she has had for years.

Mrs. W. Adams also was at Vermilion but has gone on to Edmonton to visit her son.

Mr. R. Sayers of Chauvin district was a visitor to Mr. and Mrs. C. B. of McLaughlin.

Mrs. F. Hunt of Edmonton and Miss Nixon of Vancouver are down visiting their brother C. Bull of McLaughlin.

There's not much news in Sleepy Hollow these days so have to fill up with odds and ends.

Our bold fishermen once more went to Fishing Lake. This time they struck it on that very windy Saturday. Their tent was blown down and while trying to fish on the lake the propeller broke. As they had forgotten to take any oars with them the wind blew them right to the other side of the lake. Somehow they managed to get a pole or branch and tried to punt the boat back. Their bag was one fish—better than none anyway. On the way back the water from the train was so deep that it came over the fenders and through the car doors, but eventually they managed to reach civilization once more.

Personal Advertisements: "Male old enough to know better wishes correspondence with female, not so old."

Mrs. Spence of Revelstoke, B.C. is down visiting her daughter Mrs. M. Thorson.

LEGION HOLDS SUCCESSFUL PICNIC

The largest attendance in many years was seen at the annual picnic of the Chauvin Branch of The Canadian Legion at Salt Lake on Sunday the 24th of July. Weather was ideal. Bunting, racquet ball, and other games and old occupied all afternoon. Motor boat rides were provided by Chas. Davis to all those interested and the boat was kept in continued service for several hours. Throughout the day the atmosphere was enlivened by fitting music by Piper George Reid. A bus, two large trucks and many private vehicles, manned the crowd and supplies to and from the picnic ground. Ex-service personnel from points as far distant as Wainwright were noted in the crowd.

Bungalow houses originated in India

Shower For Miss Merle Haldenby

Mrs. C. V. Cranston assisted by Mrs. L. A. Miller and Mrs. G. P. Pugh entertained at a miscellaneous shower on Friday, July 22 in honor of Miss Merle Haldenby, bride-elect. During the evening a "Musical Romance Contest" kept the guests guessing. Prizes went to Mrs. R. Wilson and Miss Helen Baker.

The bride-to-be was then presented with decorated dolls with the wish of "Buckets of Happiness" accompanying lovely shower.

Harold replaced "BARE LEG" FAD AMONG TEEN-AGERS

The teen-age girl, say the fashion buyers, is one of the most conscious of feminine shoppers these days. She has very definite ideas about what she wants to wear, and when she decides to adopt a certain style, nothing can sway her—and her sisters everywhere follow her example.

A recent discussion held among a large group of very attractive youths from high school girls, seemed to prove that they have definitely rejected the old bare-legged look. They want stockings; they love hosiery, and they came to the conclusion that they prefer seamless hose to the seamless.

The difference being that the seamless, or full-fashioned hose, has been shaped by knitting to fit the leg properly.

"Stocks were all right with saddle oxford, but there are so many pretty shoe styles now, and they don't look right with anything but stockings, remarked one pretty 16-year old, 'I think bare legs look terrible anyway'."

"All you have to do to see the difference is to put one stocking on, and leave the other leg bare—and then look in a mirror, and compare them!" another young miss suggested. "Stocks really do look wonderful. Besides, you can have different shades now to go with all your different clothes."

Comparing seamless stockings with full-fashioned hosiery, the girls showed they are definitely aware of the difference, and are "strictly for the full-fashioned" kind.

"All you have to do is put one stocking on, and leave the other leg bare—and then look in a mirror, and compare them!" another young miss suggested. "Stocks really do look wonderful. Besides, you can have different shades now to go with all your different clothes."

RIBSTONE

Mrs. Howe and children are visiting at her parents, Mr. and Mrs. Alex Clifford. She came back with Mr. and Mrs. George Clifford when they returned from Calgary Stampede.

Mrs. Jim Darling was down to her sister's wedding and visiting with her parents, Mr. and Mrs. Earl Wilde.

Harold Clifford and Edwin Dallyn moved in Edwin's house last week. It was put north of the track.

Jack Oliver and family were visitors at Jack's parents at Lone Rock, Sask. on Sunday.

A large crowd attended the dance of Mr. and Mrs. David Soloway last Friday night.

Tom Stanley who has been visiting in Ontario stopped off Sunday morning for a short visit with his brother Norman Stanley.

Mr. and Mrs. Ted Larson left for Lloydminster by bus for a short visit with Ted's folks at North-Battleford.

Mr. and Mrs. Bob Clifford were visitors to Edmonton last week. Bob returned home on Sunday but Mr. Clifford intends to visit with her parents for a week or so, Mr. and Mrs. H. Rhodes.

Mrs. Evelyn Farbridge returned last Saturday from visit with friends in Edmonton.

The Daily Vacation Bible School held at the Tabernacle from July 4-5 proved a great success. An average of 16 boys and girls attended daily. The closing program was held the last day of school. Visiting teachers on the school were Miss Valma Hill, Vermilion, and Miss Hazel Pugh, Regina. Local teachers anticipating were Miss Francis Read and Miss Annie Feltcamp.

The Annual Missionary Convention of the Tabernacle was held July 10-17. Mrs. G. Woerner, missionary on furlough from Indonesia, and now of Tacoma, Pella, Georgia, was our missionary representative. Rev. R. Merrill from Saskatoon was our evangelist.

The slides and messages illustrating missionary work in China and Indonesia will long be remembered. Mr. Merrill favored us with several beautiful violin and vocal solos. The Missionary Prizes, including all points served, amounted to over nine hundred dollars.

A special feature of the convention was the Ladies Prayer Band meeting held Tuesday afternoon at the pastor's suite at the Tabernacle. Mrs. Woerner, lead in a very beneficial and enlightening discussion concerning the life of a missionary on the foreign field.

Mrs. J. Varty, Mrs. B. Read, Mrs. B. Clifford and Mrs. E. Pitman catered to the ladies at the close of the meeting.

Mr. and Mrs. Norman Scott and two daughters of Calgary are visiting Mr. and Mrs. F. W. Scott of Artland, also relatives in Chauvin and Neilburg.

Mr. and Mrs. V. Kelly and daughter Vicki returned home Sunday after visiting a week with relatives in Unity.

Mr. and Mrs. Walter Scott left for Edmonton were Mr. Scott is to receive medical attention. We wish you every success Mr. Scott.

RIBSTONE

CLIFFE

Mr. and Mrs. A. Wightman and family, Mr. and Mrs. H. Graham and Merrill, returned from a trip to Lone Lake, Mr. and Mrs. Max Graham and Mr. and Mrs. Robert Graham are now holidaying in their cottage at Lone Lake.

Mr. and Mrs. George Ferguson of Los Angeles, who were visitors here have returned home. Mrs. Ferguson accompanied a trip to Lone Lake and brother Ed. Howard were reunited for the first time in thirty-one years. Needless to say the reunion was a happy one.

Once more Elmo and his wings of mercy made a trip to Battleford bringing back a cat, repair which was urgently needed on his father's farm.

Salt content of the Great Salt Lake is high because there is no outlet. The lake loses water only through evaporation, leaving only the salt.

Old Landmarks at Chauvin Being Removed

PARADISE VALLEY

We would like to remind all those interested in the Chauvin Cemetery that the annual get-together to clean up the graves will be on Wednesday, August 3rd. There is a lot of work to be done and we hope that all those whose loved ones are buried there will turn out. Do not leave it to just a few of the faithful who work that you should do. The ladies will serve lunch as usual along with your shovel, hoe and rake and make our cemetery a place to be proud of.

Mr. W. Beckett, Mr. and Mrs. Hamilton and Mrs. Durham all of Drayton Valley are visiting relatives and friends in town and district.

Mrs. R. Smith, Mrs. C. Beckett, Gordon and Don Beckett attended the wedding of Miss Ellen Allan and Mr. Vern Beckett at Fortburg, Alta., on Wednesday the 26th. They will make their home at Drayton Valley.

The annual meeting of the Paradise Valley United Church was held in the Church on Monday evening. A good attendance is reported. The following were elected to the Board of Stewards: Mrs. L. A. Matheson, Messrs. D. Osgood, R. Stewart, W. J. Street, G. E. Conrath and G. Venner.

Mr. and Mrs. J. H. Stewart of Saskatoon stopped overnight on their way home from Pentlon, B.C., with Mr. and Mrs. R. Stewart.

Mrs. H. Pehn (nee Gladys Rayson) and family of Des Moines, Iowa, is spending her vacation with Mr. and Mrs. J. Rayson of Moyerton.

Mr. and Mrs. J. W. Gordon and family have returned after spending a few weeks at the West Coast.

Mr. and Mrs. D. Odegard and Mr. and Mrs. C. Ames of Meeting Creek were the guests of Mr. and Mrs. D. Odegard over the week-end.

ARTLAND

Mr. and Mrs. Cooke and family returned home after visiting for the past two weeks at Victoria and points west.

Miss Norma Sherris of Minnedota is visiting at the home of Mr. and Mrs. C. T. Dell.

Mr. and Mrs. Walter Schopfer and August Schopfer and Mrs. Ella Schopfer left by car for Vancouver and points west.

Mrs. W. Marquardt left on the flyer for Vancouver.

Congratulations to the newlyweds, Mr. and Mrs. Allan Scott (nee Peggy Semple).

Mrs. W. Stankuk and family returned from their holiday.

Mr. and Mrs. F. Wright and August returned after attending the Calgary Stampede.

Miss Ruth Heister left for a week at Edmonton.

Artland is sure booming. Mr. R. Hall's has erected a lighting plant in his store.

Mr. Bob Watson returned Friday to Edmonton after attending the Scott-Semple wedding.

Mr. and Mrs. Norman Scott and two daughters of Calgary are visiting Mr. and Mrs. F. W. Scott of Artland, also relatives in Chauvin and Neilburg.

Mr. and Mrs. V. Kelly and daughter Vicki returned home Sunday after visiting a week with relatives in Unity.

Mr. and Mrs. Walter Scott left for Edmonton were Mr. Scott is to receive medical attention. We wish you every success Mr. Scott.

Salt content of the Great Salt Lake is high because there is no outlet. The lake loses water only through evaporation, leaving only the salt.

The old landmarks of Chauvin are having a pretty rough time of it this week. Don Polking, the successful tender for the old school buildings has a gang busily tearing them down.

This will do a great deal to improve the appearance of the school grounds, and will remove some buildings which have been the target of much criticism for many years—but at the same time it will give a little tug at the heart strings of a lot of Chauvinites and ex-Chauvinites.

Just how many of us learned our three R's in these buildings it is hard to say. Perhaps we did have to thaw out our inkwells on cold mornings, and perhaps we did have to crowd around the stove as slightly numbed fingers and chilly feet made it pretty uncomfortable to do the work at our desks—but somehow we liked it just the same. We had windows in the east and windows in the west (and none too many of them). We had no electric lights or modern conveniences of such esteem through it, and some none the worse in health, eyesight or mind.

Yes, it is with mixed feelings that we see the old schoolrooms demolished.

The McCluskey house, too, under the hand of its new owner, George Miller, looks a little forlorn with much of its flesh torn away, and its ribs standing out starkly against the sky. However this is not for long, for the building is merely being cut down and made into a more modern edifice for the Miller family.

CHANGE IN LIVESTOCK SHIPPING DATE

C. V. Cranston wishes to announce that shipping dates for hogs and cattle have been changed from Friday to Monday. Please note the next date for shipment is August 1 and every Monday thereafter.

Sam Gordon has returned from a short holiday at Vancouver. He made the trip from the coast to Edmonton by plane.

Miller's Garage recently made delivery to Martin Nyssvold of a nice new Chevrolet light delivery. The vehicle was brought over from North Battleford.

Mr. and Mrs. Ted Morrison returned from a visit to Vancouver last Thursday.

EARL G. BERG COMING TO CHAUVIN AUGUST 28

Earl G. Berg, optometrist, will arrive at Chauvin on Saturday, August 28. Appointments may be made at the Hotel.

IN MEMORIAM

In loving memory of Tom McDougall who passed away July 25, 1948. Till memory fades and life departs you live forever in our hearts. The story was great, the shock severe. We little knew his death so near. Only those who have lost can tell. The sorrow of parting without farewell. Loving Wife and Family. (45c)

IN MEMORIAM

In loving memory of our dear wife and mother Ida L. Bowerman who passed away July 23rd, 1947. Silent her voice and vacant her chair, Sweet are the memories that linger there. We miss her and mourn her in silence. And live in the memories of joys that have been. Lovingly remembered by HUSBAND and DAUGHTER (45c)

PRIZE HEREFORDS IN FAMOUS HERD GO UNDER HAMMER

BRANDON, Man.—One of the best-known names in Canadian livestock show rings will be passing from fair competition to the fall.

Cattlemen from many parts of Canada and the United States crowded old No. 5 barn at the provincial livestock grounds here recently to look over Malcolm McGregor's famous herd of polled Herefords. But this time Mr. McGregor, because of ill health, was not showing but disposing his entire herd.

"I have no pleasure in this event, but even the best of friends must part," he said sadly.

Mr. McGregor was born in Brandon in 1891. His mother, the late Sarah L. Lang, was the first woman school teacher in Brandon and his father, John D. McGregor, was a prominent pioneer horse breeder who sold horses for use in the South African War.

Following the First World War, in which he was seriously wounded, Mr. McGregor became associated with his uncle, the late Hon. J. D. McGregor who owned the famous Glenbrook herd of Aberdeen Angus cattle.

The latter's accomplishments form a colorful portion of western Canadian history. At one time he was a home-steader, cowboy, gold commissioner in the Yukon, foot controller and ultimately lieutenant-governor of Manitoba.

Independent Line

"When I started on my own," said Malcolm, "I did not want to go into competition with my cousins who were raising Angus cattle and I did not want to ride on my uncle's reputation."

"I chose the next best breed—the polled Hereford. I liked their hardiness, color and the fact they were polled."

Mr. McGregor bought his first cattle in 1914 and since then has been improving their quality, studying their pedigree and history.

His first show ring venture was successful when a polled bull won the Hereford grand championship at an annual spring show here.

In January, 1947, an Australian delegation of cattlemen, touring the world for stud stock, were looking for a polled Hereford.

At the Churches

BIBLE MESSAGE: Psalm 27: 27-28 Depart from evil, and do good; and dwell for evermore.

For the Lord loveth judgment, and forsaketh not his saints; they are preserved for ever: but the seed of the wicked shall be cut off.

Card of Thanks

I wish to express my sincere thanks to the Doctors, Nurses, Hospital Staff for their great care and kindness shown me; and also to all the friends and neighbors for their gifts of fruit, cards and flowers and kind expressions of love during my recent illness.

MRS. M. MacLACHLAN

ed Hereford bull good enough to take back with them. They came to Brandon from Washington, D.C. to see a bull they had heard about. On sight they arranged for the purchase and one of Mr. McGregor's finest steers was shipped to Australia.

Mr. McGregor likes to recall that the first two steers of his best side, Otto A. were grand champion Hereford steers at Toronto's Royal Winter Fair, and a summer yearling bull sold at Toronto for \$5,000.

Otto A. later was flown to Argentina and was reserve grand champion Hereford at the Palermo show there in August, 1944.

FIGHT FLIES!

There is one war which should never cease—the war against flies, states a pamphlet issued by the Edinburgh, Scotland, Public Health Department.

"Flies are detestable pests because they have dirty habits, live on filth, and soil the food we eat," the pamphlet states. "They carry diseases, decay and rot, and are a nuisance to the farmer and the housewife."

In this way flies give people typhoid fever, dysentery and worms, to mention a few diseases only. They carry the germs of the 'summer diarrhoea' which is so highly fatal to infants, and may play a part in the spread of poliomyelitis."

The Scottish publication calls for a never-ending war on flies, as does Margaret B. Smith in an article "The Fly: Enemy of Man" in the magazine, Health, published by the Health League of Canada. Miss Smith, who is Director of the Nutrition Division of the Health League, says that "any liquid or solid food that a fly has been in contact with is unfit for human consumption."

She goes on to the possibility that flies have much to do with the spread of polio. Miss Smith quotes researchers who have found in studies cases of polio, that flies were the source of the polio virus; that the house fly and the blow fly carried the virus on both the outside and inside of their bodies more often than any other species of insects investigated.

ITEMS OF INTEREST IN THE WORLD OF FOODSTUFFS

The United States Department of Agriculture placed the production of all wheat on July 1st at 1,185,490,000 bushels, compared with the June 1st estimate of 1,286,974,000 and the 1948 production of 1,286,406,000 bushels.

Winter wheat production is placed at \$12,000,000 bushels, and spring wheat production at 256,585,000 bushels.

Canada's wheat exports to Britain

DISPOSAL OF COMBINE-THRESHER STUBBLE & STRAW

Now that the combine-thresher has come into general use the disposal of crop residues, especially on fields that have borne a heavy crop, and on which a succeeding crop is desired, has become a main cultural problem on many Manitoba farms.

A common method of clearing off stubble and straw is by fire. This serves the immediate purpose of preparing a suitable seed bed but it predisposes the soil to erosion by both wind and water. Experiments conducted by the Dominion Experimental Farm, Brandon, Man., says D. A. Brown, definitely show that the organic content of Manitoba soils has been seriously depleted following continuous grain growing and the burning or removal of crop residues. Virgin soils contain 12 to 18 per cent of organic matter. The average percentage in grain land cropped for seventy years is 1 1/2 to 4 per cent. Obviously a further decline should be avoided at all costs. The practice of burning off stubble fields should therefore cease.

Straw spreaders on the combine do a good job and should be more extensively used. Unless the crop is extremely heavy, well spread straw can usually be surface tilled and a fair to good seed bed prepared at least for the planting of late barley.

Specialized rotary harrows attached to the plough or one-way, can be employed for moving the straw off the land ahead of the tillage implement and scattering it on to the newly worked land. This method of crop refuse disposal, especially when associated with ploughing, has given good results in western Manitoba.

"Whatever method may be adopted

by farmers, clearing of fields, by fire should be discontinued. As alternative to the use of fire for the removal of crop residue is essential for the prevention of a further depletion of naturally rich soil and to avoid its impoverishment.

The Dominion Field Crop Insect Laboratory forecasts a serious outbreak of cutworms over the prairie during the year 1950.

Farmers have to contend with many hazards, some of which are quite beyond their control. Cutworm damage, however, is among those hazards which farmers can themselves control, to a great extent at least. The procedure recommended to control cutworms is as follows: Ploughing and cultivating on summer-fallowed fields should cease at the end of July. The land should not be disturbed after this date and until the first half of September. If this is done a crust will form on the land and cutworm moths will not lay their eggs in such places. Care must be taken, however, that the crust is not broken by allowing livestock to pasture or run on the fields. If this simple method is followed farmers will be saved from a great deal of the cutworm damage forecast for 1950. It has been found that if the land has been well cultivated up to the end of July that the weeds which grow after that date will not use up any excessive amount of moisture. Farmers, therefore, are strongly urged to follow this practice in the management of their summer-fallowed fields.

LOCAL NOTES

Mrs. Nancy Thompson of Hayer is visiting Mrs. Don Folsom these days.
Mr. and Mrs. Ernie Davidson of Wainwright were Chauvin visitors on Sunday.
Mrs. Haldenby has her sister Mrs. Leach and daughters of Empress visiting her.
Yern Dickson who is going to University in London, Ontario arrived home Tuesday to spend a month with his parents, Mr. and Mrs. Sam Dickson.
August Schopfer accompanied by his mother and Mrs. and Mrs. Walter Schopfer left Monday for a holiday to Vancouver and other points west.
Word was received here last week

of the drowning in Quebec of Joe Bertrand, brother of Albert Bertrand in town and Mrs. Dick Nyssvold of Rorua.

Mrs. McKenzie visited her daughter Catherine in Edmonton last week.
Mr. and Mrs. Ted Kurp of Prince Rupert, B.C. visited Mr. and Mrs. D. R. Saul and family last week.
Mrs. Snyder of Edmonton visited her daughter Mrs. Stu Montjoy last week.
Mr. and Mrs. Bob Reinhardt and family were a distinct disappointment to many Canadian sports fans.
When the trials concluded at Toronto recently, spectators had seen little exceptional and a lot of mediocre performances by the Dominion's track stars as they vied for positions on Canada's team to compete in the B. E. Games at Auckland, N.Z. next Feb. 4-11.

Their showing was unmistakable proof that Canadian track and field athletes need development and specialized attention—especially the seniors. The juniors, fortunately, proved they were more or less getting some of that attention by their performance at the junior championships. And a few of them did all right against senior company at the trials, too.

But for the most part, Canadians can expect little from the 31-man team—unless they pull a "Cinderella" performance—when they take to the field for the fourth British Empire Games in 28 years.

When the last events had been run off only three records had been broken. And they were all in the distance runs—the 880 yards, the three-mile and six-mile events. Only a few others equalled standards set up by officials as a yardstick for selecting the squad.

Most of these athletes had done better previously. But even if they do return to better form it may not be good enough to produce points for the Dominion.
Don Pettie of Calgary, a member of the 1948 Olympic team, for example, won the 100-yard sprint in 18.3 seconds. And he probably will hook up with British and Australian speedsters like Jack Treloar and MacDonald Bailey who can run the distance in comfortably less than 10 seconds.

His is just one case. There are others.
Several reasons for the poor performances have been advanced by various competitors and spectators—the track was chippy, the wind was too stiff. They bucked a seven-mile-an-hour wind but this was more of a detriment to the distance runners than the sprinters.

Whatever the excuse it wasn't good enough to appease the older sports fans who recall the fine display turned in by Canada's representatives in previous games.

Remember the amazing Percy Williams of Vancouver who topped a first in the 100- and 200-yard metre sprints at the Amsterdam Olympics in 1928 and then took the 100-yard sprint at the 1930 Hamilton, Ont. British Empire Games? Or do you recall the Dominion's performance at Sydney, Australia, in 1938 when Canada's team captured eight firsts and set up seven B.E. Games records?

Despite this all-star performance, Canada ended with 161 points, second to Australia's 238. The Aussies came through with a bunch of seconds and thirds to ring up their total.

Based on the trials, Canada's representatives aren't likely to repeat that performance. But who can tell? There have been upsets before.

One brightening factor brought out in the trials and the junior championships is the work shown by the juniors. There seems to be a rising popularity of the sport among the youngsters. And after all, the 1953 Olympics aren't too far off.

—KNIFE WIND DAY
WANLESS, Man.—Forest ranger Barney Glover could get away only one rifle shot before he was forced to close in hand-to-hand battle with a full-grown black bear which surprised him. Glover finally killed the bear with his hunting knife. He suffered a black eye and severe scratches to his chest and arms.

Hints for the Household

—THE SECRET OF SAUCES
Sauces are used to enhance the flavor and appearance of the food with which they are served. Sometimes the sauce adds food value to an otherwise incomplete dish. Poor food cannot be disguised by the most perfect sauce, but a simple food may appear elegant and glamorous when accompanied by the right sauce.

One of the five basic recipes the trained chef must master is the white or cream sauce. It is sometimes called "mother sauce" because so many different sauces are evolved from it. The homemaker who makes perfect cream sauce has the base for dozens of sauces, sweet, sour, piquant or rich as the occasion demands.

A chopped hard-cooked egg, a few drops of spicy meat sauce will change plain white sauce into something special.

There are a few special sauces which are easy to make but are quite different in consistency and method.

For example a sauce that lends the right zip to spinach, best greens or green beans is made by blending a little prepared mustard and vinegar with softened butter before adding to the hot vegetable. As for sweet sauces to serve on fruits, honey as a base is excellent. A little grated orange rind added to the honey makes an excellent dressing for fruit salad. Whipped cream sweetened with honey will stay up longer than when sugar is used.

Here are several recipes for something different in sauce, suggested by the home economists of the Consumer Section, Dominion Department of Agriculture.

—Mint Sauce For Fresh Fruit
1 cup fresh mint leaves
1 cup boiling water
1/2 cup corn syrup
1/2 cup honey

1 lemon, grated rind and juice
Chop mint leaves and pour boiling water over them. Add other ingredients and let stand in a cool place for two hours. Strain and serve over fresh fruit. Yield: six servings, about 1 1/2 cups.

—Cucumber Sauce
2 tablespoons shortening
1 tablespoon flour
1/2 teaspoon salt
1/2 cup milk
1 tablespoon vinegar
1 egg
1/2 cup finely chopped cucumber (peeled)

Few grains cayenne pepper
Melt shortening, stir in flour and salt. Slowly blend in milk and cook over boiling water, stirring constantly until thickened. Remove from heat and stir in the vinegar. Beat egg until

—Wainwright School Division No. 32
Tenders for the following school bus routes will be received up to noon on Friday, July 29th, 1949 by the undersigned.

1. St. Jean Baptiste - to the village of Chauvin.
Beginning at the SE corner of 16-42 - 1/2 block S. 2nd west, 1/2 mile north to the village of Chauvin, to the public school. Total distance 3 1/2 miles, number of pupils 6. The tenders for this route will be considered on a mileage basis only. It is expected that a car will be used on this route. Please give all details in first letter as to type and year of car to be used.

2. Butteville-Airline - to the Village of Chauvin.
Beginning at Chauvin to the SW of 2-43-1 thence 6 miles north, 1 mile east 1 mile west 4 miles south and 1/4 mile west to the Chauvin Public School. Total distance approximately 23 miles. Please give complete information as to type and year of vehicle to be used. Number of pupils, not more than 14.

Lowest or any tender for either of the above routes not necessarily accepted.
